Education

Malaviya National Institute of Technology, Jaipur	2026
B.Tech in Computer Science and Engineering	CGPA : 5.42
Uch Madhyamik Vidyalaya, Sikar	2021
CBSE, Rajasthan	Percentage: 90.2

Personal Projects

JobMosaic | Techstack: MongoDB, Express.js, React.js, Node.js [\[Link\]](#)

A full-stack job portal enabling employers to post jobs and candidates to apply, upload resumes, and manage profiles.

- Developed role-based dashboards with secure authentication and resume upload using Multer.
- Designed responsive UI using React.js and Material UI for enhanced user experience.
- Built RESTful APIs using Express.js and managed data efficiently with MongoDB.
- Structured backend to support scalable integration of AI-based features (e.g., resume screening and recommendations).

Currency Converter | Techstack: React Native, Expo, AsyncStorage [\[Link\]](#)

A mobile app to convert currencies with live exchange rates, history tracking, and theme support.

- Integrated live currency exchange API for real-time conversions.
- Stored conversion history locally using AsyncStorage.
- Designed dark/light themed UI with intuitive navigation using React Native and Expo.
- Created multiple screens: Home, Rates, History, Settings, and About for better UX.

Technical Skills and Interests

Languages: Python, C++, C, JavaScript

Web Technologies: React.js, Node.js, Express.js, MongoDB, HTML, CSS,

Databases: MongoDB, SQL

Version Control: Git, GitHub

Coursework: Data Structures & Algorithms, OOP, DBMS, Computer Networks, SQL

Soft skills:

- Analytical problem-solving approach
- Reliable and delivers on commitments
- Stays calm under pressure and quickly learns new techniques
- Works effectively independently and collaborates well within teams

Experience

Research Intern – Deep Learning & Remote Sensing Jaipur, Rajasthan
Malaviya National Institute of Technology Jaipur Jul 2025 – May 2026

- Developed LiteSpecFormer, a lightweight CNN–Vision Transformer with ResNet-based residual learning for crop classification using multispectral satellite imagery.
- Generated a 564K+ sample multi-year dataset using Landsat 8/9 imagery, weather data, and village-level agricultural statistics.
- Built preprocessing pipelines for masking, tiling, spectral feature extraction, and $3 \times 3 \times 12$ multispectral tile generation.
- Integrated spectral attention, residual CNN blocks, and transformer-based token fusion for spatial-spectral learning.
- Benchmarked CNN, ViT, ResNet, and hybrid architectures using TensorFlow on GPU-based training pipelines.

Achievements

Secured AIR 6790 in JEE Mains among 1,000,000 participants and qualified JEE Advanced	2022
Qualified GATE in Computer Science and Information Technology	2026
Won 6 medals: 4 Gold and 2 Silver in inter-college tournaments in Basketball	2023-26
